

## APPLICATION OF ORGANIC FERTILIZER (8:10:3S)

### DASHEEN

#### **1 bag (55lbs) can fertilize to 50 dasheen plants in two applications**

- Apply 1lb of fertilizer (large carnation tin) per dasheen plant
- Apply 0.5lb (half large carnation tin) in the hole and mix thoroughly before planting
- At 3 months, apply 0.5lb six inches around the plant
- Mound soil over the fertilizer after each application.

### YAM

#### **1 bag (55lbs) can fertilize to 110 yam plants in two applications**

- Apply 0.5lb of fertilizer (small carnation tin) to 1 yam plant
- Apply 0.25lb in the hole and mix thoroughly before planting
- At 2 months, apply 0.75lb fertilizer at six inches (half a ruler's length) around the plant
- Mound soil over the fertilizer after each application.

### TANNIA

#### **1 bag (55lbs) can fertilize to 50 tannia plants in two applications**

- Apply 1lb of fertilizer (large carnation tin) per Tannia plant
- Apply 0.5lb fertilizer in the hole and mix thoroughly before planting
- At 3 months, apply 0.5lb six inches around the plant
- Mound soil over the fertilizer after each application.

### GINGER

#### **1 bag (55lbs) can fertilize to 300 ginger plants in three applications**

- At soil preparation broadcast a quarter bag and mix thoroughly before planting
- Apply a quarter bag along the furrow one month after planting ginger.
- Apply final application of 1/2bg along the furrow and mound
- Mound soil over the fertilizer after each application.

### SWEET POTATO

#### **1 bag (55lbs) can fertilize 600 sweet potato plants in two applications**

- Apply 1lb of fertilizer (large carnation tin) to 10 sweet potato plants
- At soil preparation broadcast a quarter bag and mix thoroughly before planting
- Apply a quarter bag along the furrow one month after planting sweet potato.
- Mound soil over the fertilizer after each application.
